

CONGRESSO **SPACV** SOCIEDADE PORTUGUESA DE ANGIOLOGIA E CIRURGIA VASCULAR CONGRESS

17-19 JUN

EUROSTARS OÁSIS PLAZA
FIGUEIRA DA FOZ

PROGRAMA

17th JUNHO / JUNE 2026
4^a feira / Wednesday

08h30 Sessão Prémio 1 - Comunicações Oraís

Prize Session 1 – Oral Presentations

Moderadores/Moderators: António Simões, Marta Rodrigues, Liliana Domingos

CO01 Does the inframalleolar disease tell us the whole tale? – a pedal modifier real world analysis

Beatriz Guimarães - ULS Gaia Espinho

CO02 MAP the risk: mean arterial pressure as an independent predictor of major adverse limb events after CLTI revascularisation

Paulo Pereira - ULS São João

CO03 Mobile C-arm versus fixed hybrid angiography in complex endovascular aortic repair: a comparative study of endonaut and azurion platforms

Armanda Duarte - ULS Santa Maria

CO04 Influence of prognostic nutritional index on outcomes after lower limb revascularization for chronic limb-threatening ischemia

Rita Piedade - ULS São João

CO05 Impact of supervised trainee involvement on postoperative outcomes following above-knee amputation: a retrospective cohort study

Paula Dias - ULS Coimbra

CO06 The Gut microbiome and vascular disease: mechanistic insights and implications for vascular surgery: a systematic review

Miguel Castro e Silva - ULS Coimbra

CO07 Surgical versus endovascular treatment of extracranial internal carotid artery (ICA) aneurysms: systematic literature review

Jorge Costa - ULS Coimbra

10h00 Sessão do núcleo de pé diabético

Diabetic foot committee session

Moderadores/Moderators: Gonçalo Cabral, Ricardo Correia, António Neves

Papel dos novos dispositivos endovasculares na revascularização do sector infra-genicular

The role of new endovascular devices in the revascularization of the infra-popliteal sector

August YSA

Reintervenção endovascular no sector infra-genicular: soluções e limites

Reinterventions in the infra-popliteal sector: solutions and limits

Anita Quintas

Bypass distal e ultradistal após falência do tratamento endovascular do sector infra-genicular: desafios e soluções

Distal and ultra-distal bypass after endovascular failure in the infra-popliteal sector: challenges and solutions

Tony Soares

Intervenções ortopédicas no pé diabético: uma necessidade negligenciada

Orthopedic interventions in the diabetic foot: an overlooked necessity

Giacomo Clerici

11h00 Coffee Break

12h00 Controvérsias em doença arterial periférica

Controversies in peripheral arterial disease

Moderadores | Moderators: Diogo Cunha e Sá, Joana Martins, Gonçalo Queiroz De Sousa

Novos dados em doença arterial periférica – estudo BASIL-3 e SWEDEPAD

New data on pad – the BASIL-3 and SWEDEPAD trials

José Oliveira Pinto

Doentes sem padrão de revascularização: amputação, tratamento conservador ou técnicas limite

Patients without a revascularisation pattern: amputation, conservative treatment or extreme techniques

Luís Loureiro

Novos dispositivos, dados antigos: como equilíbrio o avanço tecnológico/industrial com a falta de evidência de alto nível na decisão clínica?

New devices, old data: how do I balance technological/industrial advances with the lack of high-level evidence in clinical decision-making?

Gabriela Teixeira

13h00 Lunch

14h00 Controvérsias em troncos supra-aórticos

Controversies in supra-aortic trunks

Moderadores | Moderators: Ivone Silva, Tony Soares, Roger Rodrigues

Estudo CREST-2 e ECST-2, o que trazem de novo?

CREST-2 and ECST-2 trials: what new insights do they offer?

Richard Bulbulia

O stenting carotídeo está de volta

Carotid artery stenting is back

Pedro Amorim

O melhor tratamento médico é superior a intervenção em doentes assintomáticos?

Best medical treatment surpasses surgery in asymptomatic patients?

João Sargento Freitas

Com base nesta evidência, como altero a minha prática clínica?

Based on this evidence, how do I change my clinical practice?

Armando Mansilha

15h00 Sessão do núcleo de cirurgia robótica, inteligência artificial e comunicação em saúde

Robotic surgery, artificial intelligence and health communication committee session

Moderadores | Moderators: Luís Loureiro, Tony Soares, Sérgio Teixeira

Robótica endovascular: estamos prontos ou ainda estamos a brincar?

Robotic endovascular surgery: are we ready or are we just playing?

Tomas Baltrunas

Do VASCUL-AID à prática na próxima segunda-feira: o que já podemos usar em AAA e DAP?

From VASCUL-AID to Monday morning practice: what can we already use in AAA and PAD?

Kak Khee Yeung

IA na prática clínica: como usar sem violar o RGPD (e o AI Act)

AI in clinical practice: how to use it without violating GDPR (and the AI Act)

Ana Machado

Literacia Digital: como comunicar com o doente na era digital

Digital Literacy: how to communicate with patients in the digital age

Ivone Silva

16h00 Coffee Break

16h30 Sessão Prémio 2 – Comunicações Orais

Prize Session 2 – Oral Presentations

Moderadores/Moderators: Orlanda Castelbranco, Pedro Martins, Henrique Guedes da Rocha

CO08 Bovine aortic arch and its implications for aortic arch pathology management: a systematic review

Miguel Castro e Silva - ULS Coimbra

CO09 Timing of carotid endarterectomy in symptomatic carotid stenosis: a nationwide analysis

Francisco Basílio - ULS Gaia Espinho

CO10 Clinical and imaging predictors of symptomatic carotid disease: a Portuguese tertiary center care study

José Vilas Boas - ULS São João

CO11 Acute intestinal ischaemia: clinical factors and outcomes in a single-center cohort

Gonçalo Araújo - ULS São José

CO12 Are aortic arch hybrid or endovascular strategies acceptable alternatives for high-risk patients? a single-centre retrospective study.

Adriana Ferreira - ULS Santa Maria

CO13 Single-center 6-month results of the access haemodialysis conduit: experience from the vascular surgery department

Eduardo Cruz - ULS Santa Maria

CO14 Predictors of arteriovenous fistula maturation failure in a real-world cohort: a 3-year single-center study

Miguel Castro e Silva - ULS Coimbra

18h00 Sessão Rapid Pace 1

Rapid Pace Session 1

Moderadores/Moderators: Marina Dias-Neto, Pedro Garrido, Vânia Constâncio

RP01 Surgical outcomes of head and neck paraganglioma resection: a single-centre experience

Gonçalo Araújo - ULS São José

RP02 Aortic dissection in Portugal: incidence, mortality, and regional disparities from a nationwide population-based study (2010–2018)

Bárbara Costeira - FMUL

RP03 APRI as a predictor of early complications after endovascular revascularization in peripheral arterial disease

Manuel Silva - Hospital do Divino Espírito Santo

RP04 Barriers to clinical translation of small-diameter tissue-engineered vascular grafts in peripheral reconstruction

Miguel Castro e Silva - ULS Coimbra

RP05 Predictive ability of nonhome discharge score in peripheral artery disease after revascularization – single center analysis

Lara R. Dias - ULS São João

RP06 CKD stages predict MACE and limb loss after pad revascularization - a single center study

Tiago Costa-Pereira - ULS São João

RP07 Risk stratification in TASC II D aortoiliac occlusive disease undergoing revascularization: validation of the CHA₂DS₂VA score for long-term outcomes

Mário Marques Vieira - ULS Braga

RP08 Contemporary outcomes of isolated common femoral endarterectomy in the endovascular era

João Marcelo Cabral - ULS Santo António

RP09 Iliac artery stenting: added value or overuse of technology?

Paula Dias - ULS Coimbra

RP10 Twenty years experience in the management of extracranial carotid artery aneurysms: a single center retrospective cohort study

Adriana Ferreira - ULS Santa Maria

18th JUNHO | JUNE 2026

5^a Feira | Thursday

09h00 Sessão Prémio 3 – Comunicações Orais

Prize Session 3 – Oral Presentations

Moderadores/Moderators: João Oliveira, Carlos Veterano, Leandro Nóbrega

CO15 Temporal muscle cross-sectional area as a preoperative risk stratification tool in carotid endarterectomy

Carolina Pardete - ULS São João

CO16 Internal validation of the Portuguese national registry of vascular procedures – abdominal aortic aneurysm chapter

Gonçalo Araújo - ULS São José

CO17 Sex-based differences in outcomes after endovascular abdominal aortic aneurysm repair: a national registry analysis

Ana Margarida Rocha - ULS Gaia Espinho

CO18 European regional differences in abdominal aortic aneurysm growth: insights from the VASCUL-AID-RETRO study

José Vilas Boas - ULS São João

CO19 What changed in the last 22 years in the management of type B aortic dissection in a tertiary center?

Ana Luísa Silva - ULS Santa Maria

CO20 Reintervention after fenestrated/branched endovascular aortic repair – a retrospective single-center study

Inês Gueifão - ULS São José

CO21 Supra versus infraceliac sealing in fenestrated EVAR for juxta-/pararenal aortic aneurysms: does increased complexity affect outcomes?

Armanda Duarte - ULS Santa Maria

10h30 Controvérsias em aneurismas aorto-iliacos

Controversies in aorto-iliac aneurysms

Moderadores | Moderators: Isabel Cássio, Anita Quintas, Carolina Semião

Mudanças na epidemiologia dos aneurismas da aorta abdominal e as suas implicações futuras

Changing Epidemiology of abdominal aortic aneurysms and its future implications

Frederico Bastos Gonçalves

Tratamento urgente de aneurismas abdominais da aorta sem colo

Urgent treatment of abdominal aortic aneurysms with no neck

Pedro Henrique Almeida

Novas tecnologias em EVAR

New technologies in EVAR

Nelson Oliveira

11h00 Coffee Break

11h30 Quiz SPACV

12h30 Sessão SPACV

SPACV Session

Moderadores/Moderators: Maria Emília Ferreira, Alexandra Canedo, Frederico Bastos Gonçalves, Clara Nogueira

Núcleo de apoio à investigação e estudos multicêntricos

Research Support Committee and Multicentre Studies

Rita Ferreira

Estado atual do registo AAA e benchmarking

Current status of the AAA registry and benchmarking

Ryan Gouveia e Melo

Estado atual do registo de carótidas e benchmarking

Current status of the carotid registry and benchmarking

José Oliveira Pinto

Tendências e resultados do tratamento de aneurismas abdominais complexos em octagenários do registo nacional português de procedimentos vasculares

Trends and outcomes of complex abdominal aortic aneurysm repair in octogenarians from the Portuguese registry of vascular procedures

Tiago Ribeiro

Diferenças entre sexos nos resultados da endarterectomia carotídea: resultados preliminares do registo nacional português

Sex-specific differences in carotid endarterectomy outcomes: preliminary findings from the Portuguese National Registry

Joana Ferreira

13h30 Lunch

14h30 Assembleia Geral da SPACV

SPACV General Assembly

15h00 Sessão Think Aorta

Think Aorta Session

Moderadores/Moderators: Maria Emília Ferreira, Alexandra Canedo, Rui Machado, Gutenberg Gurgel, Mercedes Guerra, Ryan Gouveia e Melo

Apresentação da campanha internacional

Presentation of the international campaign

Robert Glass

Testemunhos de doentes

Patient testimonials

Discussão

Discussion

15h30 Controvérsias em dissecação da aorta

Controversies in aortic dissection

Moderadores/Moderators: Pedro Brandão, Luís Antunes, Tiago Ribeiro

Resultados atuais da técnica de STABILISE

Current results of the STABILISE technique

Luís Mendes Pedro

Resultados e indicações para a endo-septotomia

Results and indications for endo-septotomy

Gonçalo Alves

Seguimento e tratamento médico após dissecação da aorta no século 21

Follow-up and medical treatment after aortic dissection in the 21st century

Alice Lopes

16h45 Coffee Break

17h15 Controvérsias em patologia do arco aórtico

Controversies in aortic arch pathology

Moderadores/Moderators: Luís Mendes Pedro, Luís Machado, Luís Fernandes

Debate sobre re-intervenção após dissecação tipo A

Debate about the best strategy for reintervention after type A aortic dissection

FET com resternotomia é a melhor opção

FET with resternotomy is the best option

Daniel Martins

Reparação endovascular total do arco é a melhor opção

Total endovascular arch repair is the best option

Ruy Fernandes e Fernandes

Debate sobre melhor estratégia para aneurismas distais do arco

Debate about the best strategy for distal arch repair

Debranching cirúrgico associado a TEVAR é a melhor opção

Surgical debranching associated with TEVAR is the best option

Rui Machado

Dispositivos custom-made são a melhor opção – fenestradas ou ramos internos únicos: como escolher o dispositivo certo para o doente certo

CMD devices are the best option – fenestrations or single inner branches: how to choose the right device for the right patient

Marina Dias-Neto

Enxertos paralelos são a melhor opção

Parallel grafts are the best option

Daniel Brandão

Discussão final

Final discussion

18h30 Sessão Melhor Poster

Best Poster Session

Moderadores/Moderators: Maria José Ferreira, José Vidoedo, Ana Garcia

P01 Salvage of a ruptured pararenal aortic aneurysm with aorto-caval fistula using an urgent physician-modified endograft

Carolina Silva Passos - ULS Santa Maria

P02 Beyond re-entry techniques: modified VAST as a bailout strategy in complex infrainguinal lesions

Gonçalo Araújo - ULS São José

P03 Dissection entry closure using a vascular plug in the ascending aorta – pushing the limits of endovascular repair

Patrícia Carvalho - ULS Gaia Espinho

P04 Simultaneous acute visceral and bilateral limb ischemia after fenestrated/branched endovascular aortic repair – a case report

Inês Gueifão - ULS São José

P05 Physician-modified candy-plug in ruptured post-dissection thoracic aortic aneurysm: a case report

Tiago Magalhães - ULS Santa Maria

P06 Multimodal treatment of a complex gluteal arteriovenous malformation with recurrent bleeding

Carolina Tavares - ULS São José

P07 Shamblin III carotid body paraganglioma with high-risk genetic features: implications for long-term follow-up

Paula Dias - ULS Coimbra

P08 Re-coarctation and post-aortic coarctation aneurysm: when both complications meet in one patient

Patrícia Carvalho - ULS Gaia Espinho

P09 Transcatheter electrosurgical septotomy for chronic post-dissection aortic aneurysms – a case series

Inês Gueifão - ULS São José

P10 PMEG as a timely solution for complex juxtarenal aneurysms: two challenging cases

Ana Luísa Silva - ULS Santa Maria

19th JUNHO | JUNE 2026

6^a Feira | Friday

08h30 Assembleia Geral da SPF

SPF General Assembly

09h00 Sessão Rapid Pace 2

Rapid Pace Session 2

Moderadores/Moderators: Timmy Toledo, Joana Catarino, Gonçalo Rodrigues

RP11 Interhospital transfer and out-of-hours care: impact on mortality after ruptured abdominal aortic aneurysm repair
Pedro Freitas - ULS São João

RP12 Physician-modified endografts in complex aortic aneurysms: a single-center experience
Tiago Magalhães - ULS Santa Maria

RP13 Protocol for the management of patients with lower limb venous thrombosis in the emergency department – preliminary results of its application
Maria João Madeira-Cardoso - ULS Tâmega e Sousa

RP14 Three-dimensional printing in vascular surgery: when does it add value?
Joana Sobral - ULS São João

RP15 Contemporary outcomes for infrarenal abdominal aortic aneurysm repair: a single-center experience
Diana Fernandes Lopes - ULS Loures-Odivelas

RP16 Predictors and outcomes of vascular access complications after transfemoral TAVI: a 10-year single center series
Gonçalo Araújo - ULS São José

RP17 Acetylsalicylic acid in acute non-type A aortic syndromes: therapy or iatrogenic risk?
Luís Orelhas - ULS Coimbra

RP18 From silence to rupture: is there a need for a screening program?
João Ferreira Pires - ULS Santa Maria

RP19 The feasibility, efficacy, and safety of

Uzit: single-arm clinical trial in patients with symptomatic chronic venous disease
Júlia Filipe – FMUP

RP20 Fenestrated/branched endografts for post-dissection thoraco-abdominal aneurysms – a retrospective single-center study
Inês Gueifão - ULS São José

10h00 Controvérsias em trombose venosa

Controversies in venous thrombosis
Moderadores/Moderators: Mário Vieira, Ricardo Vale Pereira, Filipa Jácome

Síndrome da veia cava superior em contexto neoplásico: quando e como intervir?

Superior vena cava syndrome in the oncologic setting: When and how should we intervene?
Nuno Coelho

Tratamento atual da síndrome do desfiladeiro torácico (SDT) venosa
Current treatment of venous thoracic outlet syndrome
Manuel Fonseca

Trombectomia na trombose venosa profunda: opções e indicações
Thrombectomy in deep vein thrombosis: options and indications
Gonçalo Rodrigues

Trombose venosa mesentérica – o que fazer quando o tratamento conservador falha
Mesenteric venous thrombosis – what to do when conservative treatment fails
Carolina Vaz

11h00 Coffee Break

11h45 Sessão do capítulo de flebologia

Phlebology chapter session

Moderadores/Moderators: Javier Alvarez, Luís Mendes Pedro, Manuel Fonseca

Melhor estratégia para tratamento de telangiectasias e veias reticulares

Best strategy for the treatment of telangiectasias and reticular veins

Agustin Arroyo

O meu algoritmo de tratamento na insuficiência venosa crónica: integração das opções terapêuticas

My treatment algorithm in chronic venous insufficiency: integration of therapeutic options

José Pereira Albino

Como otimizar o tratamento médico e compressivo da doença venosa crónica

How to optimise medical and compression treatment of chronic venous disease

Cristina Feijoo

12h30 O meu pior pesadelo em trauma vascular

My worst nightmare in vascular trauma

Moderadores/Moderators: Augusto Ministro, Carlos Amaral, Hugo Rodrigues

Acidente de mota durante a noite

Motorbike accident during the night

Alice Lopes

Coluna vertebral e aorta: traumatismo vertebral com lesão aórtica e secção da coluna vertebral

The spine and the aorta: vertebral trauma with aortic injury and spinal section

Tiago Moura

Nefrectomia demasiado radical

“Over radical” nefrectomy

Pedro Brandão

Traumatismo do membro superior

Upper limb trauma

Carolina Tavares

Trauma vascular pélvico iatrogénico

Pelvic iatrogenic vascular trauma

Luís Antunes

A complexidade e heterogeneidade da tomada de decisão em trauma distal

The complexity and heterogeneity of decision-making in distal trauma

Daniel Azevedo Mendes

COMISSÃO CIENTÍFICA

Alice Lopes

Daniel Azevedo Mendes

Gonçalo Queiroz de Sousa

Luís Antunes

Marina Dias-Neto

Rita Ferreira

Tony Soares

Victor Martins

O 25º CONGRESSO DA SPACV ESTÁ ACREDITADO PELO EUROPEAN ACCREDITATION COUNCIL FOR CONTINUING MEDICAL EDUCATION (EACCME®), COM 18 EUROPEAN CME CREDITS (ECMEC®S).

THE 25TH CONGRESS OF SPACV WAS ACCREDITED BY THE EUROPEAN ACCREDITATION COUNCIL FOR CONTINUING MEDICAL EDUCATION (EACCME®), WITH 18 EUROPEAN CME CREDITS (ECMEC®S).

PARCEIROS

PLATINUM

GOLD

SILVER

Workshop Indústria Industry Workshop

18th June | June 2026

14h15 - 16h15 Bypass femoropoplíteo com Omniflow e revascularização distal com artegraft
Dr. Ricardo Vale Pereira – ULS Coimbra

Mediante inscrição prévia – vagas limitadas

Para votar nas Comunicações Orais e Posters das Sessões de Prémio utilize o QR code ou aceda a <https://spacv.org/25-congresso/>
